

Content Outline

Michelle Chen, Spring 2024

Project Title: Ryuichi Sakamoto Site

I would like the site to be built with multiple pages that have their own subsections instead of one long continuous page. Typical site navigation would either be across the top or in a side bar menu that can be revealed through a button. There is a lot of content and photography to build out into individual pages.

- **Home page/Intro**
 - Introduces main idea I want to convey about Ryuichi Sakamoto's life and works. Establish the tone for his music career and his impact on the industry.
- **Personal Life**
 - Early life – death.
 - His health
- **Career**
 - Education and career timeline
 - Awards and nominations (could possibly include this information within film works and discography page)
- **Film Works**
 - Gallery of films he has made soundtracks for.
- **Discography**
 - Gallery of albums and songs
- **Sources**
 - Page to list all sources including the Wiki page, sources for photography and other credits that need to be provided.
